1. DATA ARCHITECTURE

Data Types Utilized

100% Secondary Data

Sourced entirely from existing external authoritative publications.

Quantitative

- ✓ Monthly subscriber base counts.
- ✓ Average Revenue Per User (ARPU).
- ✓ Tariff pricing tiers.
- ✓ Market share percentages.

💬 Qualitative

- ✓ TRAI regulatory mandates.
- ✓ Corporate 5G rollout strategies.
- ✓ Management commentary.
- ✓ Tariff hike announcements.

2. SOURCING STRATEGY

Collection Techniques

Regulatory Portals

Extracting official PDF and Excel metrics directly from TRAI.

Financial Press

Aggregating historical tariff pricing from industry archives.

VALIDATION

Why These Techniques?

Authority

Government-audited metrics ensure total validity.

Compatibility

Structured datasets easily imported into Pandas.

Relevance

Directly tracks oligopoly pricing and scale limits.

3. EXECUTION

Analysis Tools

Pandas

Cleaning raw data and structuring dataframes.

Matplotlib

Plotting time-series trends for market share.

Seaborn

Generating statistical correlation distributions.

Spreadsheets

Initial CSV formatting and rapid prototyping.

FRAMEWORK

Analytical Methods

Elasticity Calculation

Measuring subscriber move against periodic tariff hikes.

Trend Analysis

Mapping historical revenue shifts and 5G adoption rates.

Porter's Mapping

Overlaying data onto competitive rivalry frameworks.
